Managing Comprehensive Health Services

HS101v.1

2 Days

HS University

Description

This in-depth two-day course is designed to help programs support and manage health services. This course will help you address issues of health care systems, documentation and record keeping, and maintaining health resources. You will learn best practices to help you update health information, monitoring classroom for health and safety issues, find solutions to medical issues such as medication administration, short and long-term exclusion, incomplete physical examinations, EPSDT, designing policies and procedures, developing health care plans, as well as PIR and Protocol requirements.

Prerequisites

- Knowledge of EPSDT

Who Should Take This Course?

All Head Start staff would benefit from this course. Designed for managers and coordinators of health services, this course will also help Directors, Disabilities Services Managers, Family Service Managers and staff, and Education Services Managers.

Objectives

✓ Understand the federal requirement for maintaining quality health services
✓ Develop procedures to best document and record medical, dental and other health information
✓ Support parents in obtaining follow-up services for identified health needs
